

Play Safe, Boil All Drinking Water!---Town Council

Hoodlums Smash 25 Windows in Cameron School

Forteen More Windows Smashed At Week-end; Chandeliers Broken And Walls Damaged.

Some young nit-wits must have thought that the story in last week's Journal concerning them smashing windows at Cameron school was a dare to create further damage. Eighteen hours after the story had been published, at the express wish of the board, fourteen more panes of glass were smashed. In addition a chandelier hit and smashed a chandelier hanging from the ceiling. The rocks are being thrown with such force that they are rebounding off the walls and breaking the plaster. Windows in both the first and second floors are being broken.

Approximately twenty boys appeared before Constable Antle this week but to no avail. If the boys knew who the guilty parties were, they refused to reveal the names. The situation has become so serious that the board has been forced to seek the help and co-operation of the council to stop this destruction.

Night watchmen have had to be employed to patrol the Cameron school grounds. Any leniency that the board might have felt towards the guilty parties is now gone and when the culprits are found there certainly will be no mercy shown them after being warned to "lay-off." In addition to the damage, the wind and dust are getting into the school rooms and creating havoc with Janitor Frank Peterson's newly kalsomined walls and washed floors and furniture. The citizens of West Coleman should realize the fact that they should take a hand in stopping this vandalism. The cost of repairs has to be borne by them as well as the rest of the taxpayers.

George Brown New Carnival Chairman

War Savings Certificate Booth To Be Carnival Feature; Still To Be Erected Next Week. -Ex-

In an effort to speed up last minute plans for the Elk camp to be held at the arena August 17 and 19, George Brown was placed in the driver's seat to replace Frank Barringham, who has been confined to his home through illness.

The four queen candidates have something really worthwhile to win, as they endeavor to outsell each other with the major prize tickets. On Wednesday morning the carnival committee bought a handsome cedar chest at Coleman Hardware and it is now on display. This prize will be given to the candidate selling the most tickets. The major carnival prizes are now on display. At Pattinson's Hardware, the five-piece bedroom suite has brought much favorable comment, and Wilfred Dutil has promised to put the 7-piece kitchenette suite on display at the week-end.

The biggest news of the week was the announcement that a war savings certificate booth will be set up. It will be under the management of Postmaster Graham. A sixteen-number wheel will be installed and 25c gets you a \$5.00 certificate. It will be noticed not one cent of profit will be made on this booth, as the board must be covered in order to get the four dollars which entitles the winner to the five-dollar certificate. Anyone wishing to buy a certificate outright may do so without trying their skill on the wheel.

All Elks are asked to be on deck at the arena next week to erect the various booths. There is much hard work ahead and everyone's help is required.

An entertainment feature has been arranged for each evening. A young lady has agreed to give several exhibitions of Highland dancing on the dance floor. Arrangements were made late Wednesday morning and further publicity will be given this next week.

IMPORTANT NOTICE RED CROSS

The regular meeting of the Red Cross will be held on Monday at 8 p.m. at the council chambers. All committee members please attend.

Legion Club Recipient of Eleven Beautiful Paintings

Work of Fred Founds Receives Enthusiastic Comment; Blaimore Legion Awards Mr. Founds A Contract For Similar Paintings

Eleven magnificent oil paintings adorn the walls of the Canadian Legion Club rooms, the work of Fred Founds, local bank teller. The paintings, large and small, have been enthusiastically acclaimed by all who have seen them. They for the most part follow the cartoons of Capt. B. Bairfather, famous British cartoonist, and show many realistic scenes of the first great war.

The painting that is the universal favorite and one which won Mr. Founds a contract from the Blaimore Legion club for a reproduction, is the painting entitled "A Land of Freedom." A huge Union Jack waving in the breeze with the sturdy British bull dog dominates the picture. It represents the strength of the United Kingdom. A squadron of planes can be seen in the top left hand corner while at the bottom is the mighty British fleet. A brick fort stands off in one bottom corner. It is really a majestic picture and one of which Mr. Founds can well feel proud. Another picture which catches the eye is that of His Majesty, King George VI. He is dressed in the uniform of a colonel of the Grenadier Guards. The deep rich colors of the uniform and the startling likeness of the King makes one stop to gaze with admiration at such a splendid piece of artistic work.

The officials are so pleased with their new premises and at the brilliant work of Mr. Founds that they will open their premises to the public for a few hours on a day to be determined. An announcement will be made through The Journal and it will be well worth the visit for the public of Coleman and the Pass to view these oil paintings.

McLeod-Shone Combination Wins Tennis Tournament

Ten Couples Compete; Plan To Hold Another Tournament In Near Future.

The second tournament of the season was held at the local tennis courts on Sunday when ten couples competed in a mixed doubles tournament. Margaret McLeod and Dick Shone proved themselves masters of all they surveyed as they compiled a grand total of 41 points. Runners-up were the Muriel Naylor-George Jenkins combination with a total of 38 points.

Mrs. Joe Spievak was complimented on her efficiency in providing the competitors with a delicious luncheon. Chick Roughhead in charge of the draw kept the games running smoothly. So successful was the tournament that another is planned for the near future.

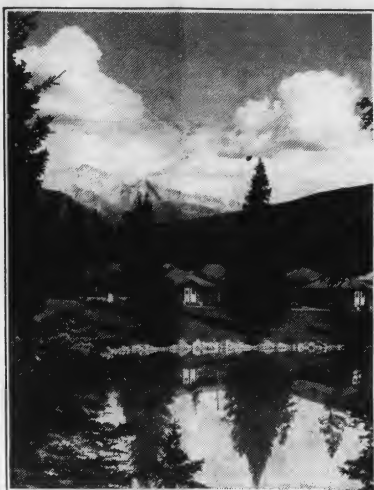

COLEMAN BRANCH RED CROSS MAINTAIN STEADY SHIPMENTS TO HEADQUARTERS

Since May 31st, 476 articles have been shipped to Coleman from Coleman branch, consisting of bed gowns, pneumonia jackets, pyjamas, pillow cases, sheets, helmets, socks, scarves, and sweaters. Latest shipment has been knitted articles—34 pairs of socks, 20 sweaters, 5 scarves and 2 helmets.

BELLEVUE WATERWORKS CONTRACT AWARDED
CONTRACTOR J. S. D'APOLLONIA

The contract for laying of a new water main in Bellevue has been awarded Contractor J. S. D'Apollonia by West Canadian Collieries. Work commenced last week, the men employed being mostly from the unemployed ranks in Bellevue.

A BEAUTIFUL RESORT IN THE CANADIAN ROCKIES

Portion of Jasper Park Lodge, famous Canadian National Railway Resort, with Lac Beauvert in foreground. It was here that King George and Queen Elizabeth made a short stay on the royal tour in 1939.

Pucksters Take Stranglehold on Ball Series

Trim Wrentham 6-0 and 12-1 To Lead Two Games to Nil; Remaining Games to Be Played At Wrentham.

Coleman Pucksters, 1939 provincial intermediate baseball champions, found Wrentham ball chasers fairly easy prey on Sunday as they pounced on them for two soft victories by scores of 6-0 and 12-1. They were the first two of a best-of-five game series, the remaining games to be played at Wrentham next Sunday. Good crowds attended both games.

Marconi pitched for Pucksters in the first game and his team mates almost gave him a no-hit no-run game as their exceptionally brilliant fielding kept Wrentham players from reaching first base. It was in the ninth inning when Erickson hit safely to spoil Marconi's fine pitching feat. Pucksters scored two runs in the first inning and four in the fifth to score a decisive 6-0 decision. Batteries were for Wrentham: Whitney and Erickson; for Pucksters: Marconi and Gate.

Eddie Seaman, just returned from Calgary, was sent to the pitcher's mound for Pucksters in the second game, Johnny Elick taking over the catching duties. Wrentham started Ellison and Erickson. Pucksters again got away to a nice start with a run in the first inning. Ellison got into difficulties in the third inning when Pucksters' big bombers shelled him mercilessly. He managed to retire the side after three runs had been scored. In the fourth inning the locals started in where they had left off in the previous inning and were treading a path around the bases when the Wrentham coach called a halt to call Ellison off the field and sent in Popinak. Three runs had been scored, two men were on bases and only one man out when Ellison was sent to the showers. Popinak sacrificed one run before retiring the side. He pitched good ball until the seventh inning when Pucksters solved his style of delivery and the merry-go-round was on again. This time four runs were scored before the harassed pitcher could retire the side. During all this upheaval to the Wrentham pitchers, Eddie Seaman was going serenely along, never in difficulties and enjoying life to the full. He was deserving of a shut-out but

Livestock on Highway Menace To Motorists

Cows Grazing on Roadway Between Coleman and Frank Real Hazard.

Livestock, cows more so than horses, are proving a real menace to motorists driving between Coleman and Bellevue. During the past few weeks these animals have been particularly dangerous as they usually make up their mind to cross the road when the motorist is about to pass them. The portion of the highway running alongside the old MacLaren lumber mill site, and through the town of Frank, are especially dangerous as cows are continually grazing there.

The heavy taxation derived from the motorist should protect them from a menace of this nature which might easily cause serious accident to both passengers and car.

The provincial coffers have been enriched considerably in recent months by heavy fines against traffic violators. The coffers could be further enriched by penalizing owners of cows who allow their livestock to graze on the main motor highways.

LOCAL NEWS

Mr. Mike Hlebachuk and son left on Saturday for a vacation at Edmonton.

Mr. Wesley Vincent, of Turner Valley, spent the week-end at his home here.

Mr. and Mrs. Steve Milan are spending a vacation at Edmonton and district.

Mrs. Walter Dibble and family and Mrs. Frank Graham and family spent Tuesday at Waterton.

Mr. and Mrs. A. Toppo and children are spending two weeks vacation at Trail, the guests of relatives.

two errors in succession by his team mates robbed him of honor, a run being scored against him in the sixth. While giving up nine hits Eddie kept them well enough apart that Wrentham never became dangerous. Only on one occasion did he fill the bases with two men out, and his team mates got him out of the hole with a nice pop to home plate with the runner streaking for home, Johnny Elick getting him out in the nick of time. Pucksters were too good and won as they pleased 12-0.

Local People in Car Smash on Sunday Evening

Rushes to Bellevue Hospital For Medical Attention; Car Badly Smashed.

Four Coleman young people were in a bad car accident on Sunday afternoon about fifteen minutes to six when their 1930 Chrysler, driven by Albert Farano, got a flat tire in the front wheel causing the car to swerve onto the loose gravel and into the ditch on the right side of the road where it turned completely over and came to rest on its hood. The scene of the accident is at the top of the steep hill east of Burnis and where is located the large checker board sign.

Miss Alice Peti osky was the most seriously injured, suffering painful shoulder and wrist injuries. Miss Louise Peronik, of Palm Confectionery staff, suffered head injuries. Harry Coccioloni suffered right shoulder and arm injuries and Alberta Farano received head injuries. The injured were quickly rushed to Bellevue hospital by passing motorists where they remained until the arrival of Dr. Leske. They were detained for two hours at the hospital and then allowed home.

The car, badly smashed, was towed into Sentinel Motors on Monday. No insurance was carried on the machine.

School Board Notes

Regular meeting of the school board was held in the board room on Tuesday evening. Present, Chairman Fraser, Trustees Fleming and Janotak.

Miss Jean Park, newly appointed Household Economic teacher was present along with Mr. Sam Bannan, of Blaimore. Several contracts for dealing with salary and travelling expenses were signed by all parties concerned. Miss Park will be given \$200 travelling expenses to be borne on a 50-50 basis with Blaimore. The provincial government's grant pays 50% of the travelling expenses.

A letter of acceptance for a position on the public school teaching staff was received from Miss Myrtle Johnston. Salary \$1060.

A letter requesting that the board wipe out taxes owing on his property was received from A. Phillips, at Request was granted.

A supply of typewriter ribbons was authorized.

A request had been made to chairman Fraser by Mr. A. Webster that the board grant registration officials use of both Central and Cameron schools for registration purpose. Both schools are at present having various repairs made to them as well as the janitors being still in the midst of their cleaning operations preparatory for the opening of the school term. It was felt by the board that the registration officials should seek quarters elsewhere.

Accounts passed include:

Gordon Milley and Challis Easton were home on leave over the week-end from Medicine Hat, where they are attending the instruction school in military airplanes. On their way home on Friday Gordon's car broke down near Monarch, only allowing them four minutes to catch the west-bound train. They returned to Medicine Hat on Sunday afternoon.

Local Water Supply Received Very Un- favorable Report; Steps Taken By M.H. Officers to Purify Water

On Tuesday morning a report was received from R. M. Shaw, M.D. Provincial Laboratory, University of Alberta, Edmonton, on the last sample of drinking water sent by town officials for analysis. The report showed Coleman's drinking water supply as very unfavorable and while no suggestions were offered for its purification the analysis caused the council to go into immediate conference with the local medical health officers.

Six hours following receipt of the report Dr. Rose and Constable Antle went to the reservoir where "to make the supply immediately safe a sufficient quantity of chlorine was added to the water Tuesday afternoon, and is being added daily proportionate to the amount of water hoisted through the pumps."

It was in order to allay false reports, that The Journal sought the above statement from the medical health officer.

Asked what was causing pollution of the water, Dr. Rose gave this statement:

"The investigation by the medical health officers and Constable Antle on Tuesday afternoon showed that the willow bushes within 20 feet of the intake at West Coleman is the outdoor public toilet for bathers, young and old, who frequent the adjacent swimming pool. What steps will be taken to obviate this condition is not yet determined."

The council is at present giving the problem its earnest attention and a statement is expected to be forthcoming at the regular meeting next Tuesday evening.

Special Meeting Held Tuesday to Discuss Water

Wife For Six More Containers; Will Send Further Samples To Edmonton.

The council sat in special session on Tuesday evening to consider the letter received from R. M. Shaw, M.D. University of Alberta, re local drinking water supply.

It was decided to wire for six additional containers and get samples of water from Nez Perce creek, Beck's Townsite, a point west of Beck's townsite, at the water intake, and also two other points taken at random around town. These samples will be sent immediately to Edmonton for analysis.

A large quantity of chlorine was ordered to be bought.

The secretary was also ordered to post notices in various parts of town advising all water users to boil their drinking water. The medical health officers as well as officers of the R.C.M.P. are working steadily to prevent contamination of the water and success is expected to attend their efforts within a short time.

Mrs. Joe Sikora Died Suddenly on Sunday Morning

Passed Away in Miners' Hospital; Survived by Husband And Three Children.

Death came suddenly to Mrs. Joe Sikora, aged 36 years, who died early Sunday morning in Coleman Miners' hospital. She had been rushed there earlier the same morning when she was seen her condition was becoming worse. Death came six hours later.

Deceased came from Poland to Coleman in 1924 where she was married to Joe Sikora. They have lived here since with the exception of a short residence in British Columbia.

Left to mourn her passing are her husband and three children, Joe, Jr., 14 years; Mary, 12 years, and John 2 1/2 years.

The funeral was held on Tuesday morning, services being at the family residence at East Coleman and Holy Ghost church, Rev. Father Leo Sullivan conducting. Interment was made in Coleman Catholic cemetery.

Powerful But Mysterious

Great, powerful but mysterious is the drug Colchicine. Colchicine is a word to conjure with. It is a drug which has latent within it enormous benefits for mankind in more than one field, but at the same time contains potential dangers alarming to contemplate.

In the realm of medicine, colchicine has been used in minute doses with beneficial effect in the treatment of gout. Used recently on a small experimental scale it was found that it will destroy cancerous tumours, but on the other hand, that it will cause cancer.

In the fields of horticulture and arboriculture, it has very recently been discovered that colchicine can be utilized to very materially increase the productive power of certain forms of plant life. Colchicine has been used to evolve new varieties of plants, to increase the sizes of stems, blooms and seeds of existing varieties of plants and to hasten the maturity of some varieties.

The Toronto Daily Star reported an experiment at the University of Illinois College of Medicine in which colchicine was used to treat four hopelessly cancerous cases, following the discovery of an English scientist that colchicine will stop or delay the division of cancerous tissue cells. While the lives of these four patients were not saved, some interesting and perhaps important effects were revealed. In all four cases, in a week or two the colchicine caused large cancers to start breaking down, but two of the patients died of colchicine poisoning before the cancer regression had gone far.

"In the other two," to quote the Toronto Star, "large cancers mostly disappeared after several weeks." "It was then that the effects appeared which the physicians report was startling. Around their edges the malignant tumours began to grow again and this second growth was much more rapid than the original. One patient became bald while the cancer was breaking down. When the tumour began to grow again a full head of hair reappeared."

Some Real Benefits

It is quite evident that colchicine has an important influence upon cell division. This has been confirmed by scientists working in fields other than medicine. They have discovered that, in plant life, colchicine has the power of multiplying chromosomes within the cells, and more particularly those which contain a normal number of cells, known as diploids, as contrasted with polyploids, or those plants which contain a large number of cells.

Among those in the forefront of this type of experimentation in plant life is Dr. F. H. Peto of Ottawa, who has found that colchicine can be used beneficially on diploid plants to materially increase size, productive power and to hasten maturity and it is in this field that colchicine is destined to yield early and important benefits to mankind.

Working first with flowering plants Dr. Peto discovered that the use of colchicine resulted in doubling the size of snapdragons and phlox with remarkable increases in size of stem, leaf and seed. Similar results were secured with clarkia and larkspur and in addition the period of bloom was lengthened and fragrance strengthened.

Still later, Dr. Peto found that by using colchicine on sugar beets that he could produce a new polyploid beet yielding a 13 per cent. increase in size and a 15 per cent. increase in sugar content, a discovery which should be of immense value to the sugar beet industry in Alberta and opens up the possibility of developing a beet seed export industry in British Columbia.

Value To The Prairie

Perhaps the greatest value of the application of colchicine to plant life in the prairie provinces lies in the possibilities of reforestation and afforestation. Hopes are held out of not only developing new and valuable varieties of trees but of speeding up growth and thus reducing the cost of production of trees of timber value. Such a discovery has great potential value in the northern reaches of the prairie provinces where forest areas have been destroyed by fires or exploitation, and on the open prairies where quick growing trees, possessing both an economic and aesthetic value would be more than welcome. It also opens up the possibility of developing fruit trees of real economic value suitable to prairie conditions.

The task of improving on Nature in the development of trees until now has only been attempted by selective and hybridization processes. "Chromosome doubling, however," according to Sidney M. Katz, in a recent issue of the Magazine Digest, "has presented a new approach. 'Some 30 species of trees,' says this writer, 'have been treated with colchicine, and while it will take the better part of a lifetime to pass final judgment, there is evidence on hand that rich new varieties will be induced without great difficulty.'"

"One of the main reasons for the forest breeder's optimism," continues Mr. Katz, "is that in Sweden polyploid forms of some native Canadian trees exist in a natural state. They are trees of great economic importance. Basing their opinions on observations made in Sweden, biologists speculate that the new polyploid trees in Canada will grow more rapidly than the diploid. Speedy growth is an important economic factor in forestry, because, as Dr. Walter Mufford of the University of California estimated, 'To cut the growing time of a tree at any stage, will reduce the growing cost exactly 40 per cent.'"

Laboratory work to date appears to indicate that colchicine is likely to confer material benefits on mankind in the realm of horticulture and arboriculture in the very near future. What hope it holds for man in the treatment of disease seems more remote, although this avenue is not being neglected, for experiments are now being made in an effort to secure the beneficial effects without the destructive aftermath.

India Stops Hoarding

To combat silver hoarding the Government of India announced an immediate issue of one-rupee bills, as in the First Great War. The rupee is normally the equivalent of one shilling, sixpence (about 33 cents).

Manchuria's coal deposits have been estimated more than 4,800,000,000 tons and its iron deposits at more than 800,000,000 tons.

Sounds Pretty Bad

A visitor was being shown over a village church, and was delighted with all he saw. As he prepared to leave he said to the vergor: "You've shown me your church, and I'm charmed with it. Now, what kind of a person have you got?"

The vergor dropped his voice and replied: "You wouldn't be charmed with him—leastways, not when he's in the pulpit. We call him a pud'n-spoller."

Left Small Fortune

Friends cleaning out the home in Glen Rock, N.J., of the late Fred Kooreman, an apparently poor gardener who immigrated from the Netherlands 44 years ago, were astounded to discover \$24,000 in cash hidden in a crude tin box. He left no will.

The difference between green and black tea is that in producing the latter the leaves are allowed to ferment.

Not Really Impossible

Canada Might One Day Be Centre Of British Empire

There has been recently, especially in United States papers and magazines, a good deal of discussion as to the possibility of Canada becoming the centre of the British Empire.

Such a development is not impossible. Writers on the prospects of imperial relations have not infrequently in the past pointed out its possibility. But if it does come, it will not merely because of the disturbances in Europe or because of the central geographical position of the Dominion, but because Canada proves that it is worthy of the distinction.

Recent events have, of course, sharpened the discussion. Canada is on the verge of the scenes of aggression and the war has begun to have a considerable effect on its industrial development. Canadian industry has already become a very important factor in its activity and in future, as capital, seeking safer investment, flows into the country.

Canada's financial organization has developed remarkably in the last 25 years too, while its broad acres and natural resources can make a home for a much greater population. But along with these things, much will depend on the strength of Canada's political organization, on the breadth of its world view and its avoidance of a parochial outlook in its own affairs.

Should the time come that there is a parliament of the British Commonwealth of Nations, Canada would, after all, be the logical place for it to assemble.—Sault Daily Star.

Idea In Education

College Professor Advises Studying

What Interests You Most Here's a new phrase, "the law of increasing returns." Listen to what a great educator, Professor William Pepperell Montague, of Barnard College, Columbia University, says about this law of increasing returns.

"About an idea in education which is at variance with the logic held by many teachers," Dr. Montague says: "If you will but disregard all well-meaning advice to disperse your studies over a wide field, and if you will take instead something like the highly unified course of study prescribed at Oxford or Cambridge, then you will realize the truth of the Law of Increasing Returns. For, whatever your chosen field may be—geology, or literature, or economics or mathematics, there will come a time, a magical moment in your life, when you will feel the body of concentrated, unified and painfully acquired knowledge within you become suddenly quick and alive in its own right. You will have acquired an enthusiasm that will grow by what it feeds upon and be to you an ever mounting joy."

If, on the other hand, you pursue the will-o'-the-wisp of two generations ago—the all-round liberal education supposedly befitting a gentleman and consisting of a polite acquaintance with a dozen varied subjects, you will find after ten years that none of these acquaintances have become friends, and that most of them will have slipped altogether from your mind.

The Blockade Weapon

Victory Rests On Ability Of Britain To Prevent Enemy Receiving Supplies

Any hope of Great Britain's winning this war or shortening its length appears more and more to depend on the British ability to prevent Germany from receiving essential supplies from the western world.

This is axiomatic, according to British experts. It is distinct and apart from the British ability to ward off an invasion successfully, because if invasion is successfully repulsed, there remains the task of defeating continental Germany.

It has therefore become essential to the British to cut off the Germans from the supplies now reaching them through Spain. It seems probable to observers that the moment is approaching when such action will have to be taken.

Fourth Meatless Day

The Italian government decreed that Tuesday shall be a meatless day, making four such days a week, and ordered sharp rationing of bread served in restaurants. The ministry of agriculture announced at the same time that eating of more fruit would be encouraged.

STOP Scratching *Relieve Itch Fast*

The quick relief from itching of eczema, scabies, athlete's foot, insect bites, and other skin troubles, can be obtained by using this famous, world-famous, itching relief. It is a true skin medicine, and it is the only one of its kind. It is the only one that is so effective. It is the only one that is so safe. It is the only one that is so cheap. It is the only one that is so easy to use. It is the only one that is so reliable. It is the only one that is so famous. It is the only one that is so well known. It is the only one that is so loved. It is the only one that is so trusted. It is the only one that is so recommended. It is the only one that is so praised. It is the only one that is so admired. It is the only one that is so respected. It is the only one that is so honored. It is the only one that is so revered. It is the only one that is so worshipped. It is the only one that is so feared. It is the only one that is so revered. It is the only one that is so worshipped. It is the only one that is so feared.

THE WILSON FLY PAD CO., HAMILTON, ONT.

Just A Century Ago

Paddle-Wheel Steamer Made Trip From Liverpool To America One hundred years ago the paddle-wheel steamer *Annua* was on the high seas bound from Liverpool to Halifax and Boston.

The Britannia was not the first steamship to cross the Atlantic. The *Savannah* had done it (with the aid of sail), so had the *Royal William*, the *Stratus* and the *Great Western*. But the Britannia was the first under power to make the run.

She and her sister ships were to begin a revolution in trans-oceanic travel, the biggest until the arrival of the clipper flying boats. The good people of Boston, though not unimpressed by what was happening, celebrated more than they could well realize, when they made the Britannia's arrival the occasion for a great ovation.

The end of the domination of sail was in sight from the day of the first arrival in Boston.

Under ordinary circumstances a big centenary celebration by the Cunard Line, now the Cunard White Star Ltd., would now be under way.

Equipment Is Complete

Emergency Car Has Been Presented To City Of Portland

The world's first "disaster car," given to Portland, Oregon, by a local merchant, enables that city to cope at a moment's notice with almost any case of calamity. The big red-and-white bus, capable of a speed of 60 miles per hour, is equipped with everything from a complete emergency hospital, with two operating tables and oxygen apparatus, to an outboard motorboat, a portable generating plant and flood-lighting system, a two-way radio, a movie camera, toboggans and skis for mountain rescues, and a field kitchen. The car's six-man crew is equipped not only to give emergency treatment for all sorts of accidents, but to cut through heavy metal or wood, sever high-voltage power lines or hold grids or other heavy objects from victim's bodies.

SELECTED RECIPES

HONEY KISIP COOKIES

1 1/2 cups fat
1/2 cup honey
2 eggs
1 cup sour cream
1 1/2 cups flour
1 teaspoon baking powder
1/2 teaspoon salt
1/2 teaspoon soda
1/2 cup chopped nut meats
1/2 cup chopped dates
1/2 teaspoon nutmeg or 1/4 teaspoon vanilla extract
1 cup Kellogg's Rice Krispies
Cream fat and honey. Add sifted beaten eggs and sour cream. Stir flour with baking powder, salt and soda, combine with first mixture. Stir in nut meats, dates, flavoring and Rice Krispies. Drop from a dessert spoon onto lightly greased baking sheet and bake in moderate oven (375 degrees F.) about 20 minutes. Yield: Two dozen cookies (4 inches in diameter).

SYRIAN LAMB

14 Christie's Soda Wafers
1/2 cups canned tomatoes
1/2 teaspoon cinnamon
1/4 teaspoon allspice
1/2 cup nut meats, dates, flavoring and Rice Krispies. Drop from a dessert spoon onto lightly greased baking sheet and bake in moderate oven (375 degrees F.) about 20 minutes. Yield: Two dozen cookies (4 inches in diameter).

Crumble soda wafers and add tomatoes and seasoning. Brown meat in hot fat and add to the tomato-cracker. Pour into greased baking dish, sprinkle with cheese and bake in a hot oven (425 degrees F.) 15 minutes. Six portions.

Trouble In Store

At a concert an old man was given the job of collecting tickets at the door. After a time he sought out the secretary.

"I think there is going to be trouble for you," he whispered, mysteriously.

"Why, what's the matter?"

"Bignony, no less," was the ticket-collector's awed reply. "I've let in two women who said they were the secretary's wife, and now there's a third wanting to come in."

A Favorite In Britain

One Of Ex-Kaiser's Grandsons Is Living In London

One of ex-Kaiser Wilhelm's grandsons will be raising bombs on England, when and if the invasion comes, and another will be dodging them somewhere in London's fashionable West End.

It was learned that Prince Louis Ferdinand, son of the former Crown Prince, has been given a lieutenancy in Hitler's flying forces and is now assigned to the blitz squadrons.

Meanwhile in a bachelor flat in Mayfair, another son of the ex-Crown Prince, Prince Frederick of Prussia, is watchfully waiting under surveillance and protection of His Majesty's government—for whatever may come to pass.

Prince Freddy has been a British favorite for years. When the war began, plans were made to ship him to Canada, and, apparently in fear of his life, Queen Mary requested that his movements and whereabouts be kept secret.

Recently the plans to send him to Canada were abandoned together with plans for evacuation of numerous children refugees, prisoners and suspected Fifth Columnists.

Prince Louis Ferdinand, favorite grandson of the ex-Kaiser and the only member of the imperial family whom Hitler really likes, has been in the United States a number of times and spent five years working in the Ford plant in Detroit.

Called For Service

Ontario Man Probably Most Decorated N.C.O. In Canada

John Benjamin French, reported to be the most decorated N.C.O. in Canada, has been called for British service from his military post in the Ontario government service.

French holds the DCM and two bars, the Military Medal and two bars, the French Croix de Guerre, the Belgian Croix de Guerre, and was mentioned in despatches 14 times during his service with the 2nd Infantry Battalion in the First Great War.

He was also recommended for the Victoria Cross and was appointed a King's sergeant for gallantry on the field.

Atlantic Crossing Made In Sixteen Hours By British Flying Boat

Eoucheville, Que.—The big flying boat of the British overseas Airways dropped out of the sky onto the smooth waters of the St. Lawrence river at this airplane base near Montreal, Aug. 4. After refueling, she took off for New York on the fourth leg of her flight from the United Kingdom.

She left two passengers and a bag of mail before heading southward with a third passenger. The two were Geoffrey Cumfrie and C. R. Fahey, representatives of Lord Beaverbrook's ministry of aircraft production in the United Kingdom.

The third passenger was William J. Donovan, Buffalo lawyer, who had a job to do for the United States government. He was returning to Washington after two weeks in the United Kingdom.

The plane was in command of Capt. J. C. Kelly-Rogers who has flown planes here from Great Britain while the Imperial Airways were carrying out their experimental trans-Atlantic flights. Two other officers and two radio officers made the flight with him.

Passengers described the flight as "very pleasant."

The flight started from an airport in the west coast of Britain. From there across the Irish Sea they were escorted by a group of Royal Air Force fighting planes. "I was very pleased to see the fighter escort because of the Henkels (German planes) that are around," Fahey said. He is president of the Fahey Aircraft Corporation, producers of the Fahey battle bomber.

After a couple of hours at an Elbow port the big plane took off for Montreal, reaching there after a flight of about 16 hours. The Montreal-Boucheville flight took 6 1/2 hours.

Business As Usual

London Docks At Work Despite German Bombs And Threats

London.—The London docks—biggest in the world—are functioning normally and British officials said the volume of traffic was reduced, not by German bombs or threats, but by the natural inroads of war on the world's shipping.

Behind busy city streets just a few miles from the harried shipping lanes of the English channel, cargo ships from the seven seas were loading and unloading as if the war did not exist, swinging out meat and wool and swinging in manufactured goods.

Trials To Start Soon

Vichy.—Trials designed to establish war guilt of prominent French military and political personages were set tentatively for the second fortnight in August. Cases will be tried before a new supreme court of justice which will have jurisdiction in all cases such as those which since 1876 had been tried by the senate.

Maximum Of Liberty Under Defence Law Is Recommended

Ottawa.—Amendments to the Defence of Canada Regulations dealing with the registration and internment of enemy aliens are recommended in the final report of the special committee of the House of Commons which reviewed the regulations at 25 meetings, held in camera.

The report was tabled in the house by Finance Minister H. J. L. Itley, chairman of the committee. The report said it was the unanimous view "that all measures should be taken which were considered necessary for the safety of Canada but that the maximum amount of liberty under the law should be maintained consistent therewith."

Prime Minister Mackenzie King told Conservative Leader R. B. Hanson the regulations would be consolidated and reprinted with amendments as soon as possible. This was recommended by the committee and Mr. Hanson considered it important in view of the fact the committee's report might be concurred in by the house this session.

If the committee's recommendations are adopted, British subjects of German or Italian origin naturalized after Sept. 1, 1922, will be required

Surplus Will Be Needed

United Kingdom Requires All Food-
Stuffs Canada Can Spare

Ottawa.—Canada is in a better position than ever before to supply foodstuffs to the United Kingdom and all existing surpluses will be needed "sooner or later," Hon. J. G. Gardiner, minister of national services, told the House of Commons in the course of a review of progress in his two departments. Mr. Gardiner still administers the agriculture department.

Mr. Gardiner said new bacon and pork product agreements would be worked out with the United Kingdom during August. New agreements to aid apple growers in Ontario and British Columbia would be reached.

Wheat imports into the United Kingdom from European countries in peace time about equalled Canadian exports to European countries, Mr. Gardiner said. These sources were now lost to the United Kingdom and the European market had been lost to Canada. There was no reason why Canada should not fill in the needs of the United Kingdom.

Deprived Of Citizenship

Prominent Frenchmen Have Also
Had Properties Confiscated

Berlin.—A long list of prominent Frenchmen have been ordered deprived of their citizenship and their properties confiscated, the German wireless said.

One of the first since the Petain regime decreed action against those who left France "without valid reasons" between May 10 and June 30, included two members of the internationally known Rothschild banking family. It was broadcast by the government station at Vichy and picked up here.

The two Rothschilds were Baron Edmond, head of the French branch of the family's banking operations, and Baron Maurice, a member of the French senate.

Others on the list included some of France's leading industrialists, political leaders and journalists.

Certificates Handy Size

Registration Slips Must Be Carried
At All Times

Ottawa.—Certificates of registration to be issued by the national services department are white slips, billfold size, giving the name and address of the registrant, the date on which he registered, and the name and number of the polling division and electoral district in which he registered.

Printed in English on one side, French on the other, it will also bear the signature of both registrant and registrar and an order that the certificate must be carried by the registrant at all times.

to register along with enemy aliens. At present such persons are required to carry it if naturalized after Sept. 1, 1929.

Court hearings on applications for naturalization by enemy aliens should be stopped, the committee stated. No certificates of naturalization are now issued to German or Italian applicants for citizenship but the committee found confusion was caused by the fact that courts continued to hear applications.

"Your committee is of opinion that measures should be taken to invest the important step of naturalization with greater solemnity and to impress upon those who apply for the privilege the importance of the obligations which they assume as British subjects," the report said.

"Your committee therefore recommends that at the next session of parliament a special committee of the house be appointed to consider and review the law relating to naturalization. Your committee is also of the opinion that the special committee should review as well the law relating to deportation and again consider and review the Defence of Canada regulations."

2371

Used To Full Capacity

Britain Is Taking All War Material
Canada Can Produce

London.—Viscount Caldecote, Dominions secretary, told the house of lords that Britain is making the fullest use of Canada's capacity to produce war material, whether it be existing facilities or capacity that could come into production prior to January, 1942.

Answering Lord Barnby, who asked "how far the plans for war production in this country have been modified by the policy of increased war production in the Dominion of Canada," Lord Caldecote said a large part of Britain's orders were for specialized munition requirements. They involved an enormous capital outlay for new plant premises or upon adaptation of plant machinery.

Pleading for stimulating of Canadian industry, Lord Barnby said "I have heard some criticism in the past of Canada's war effort, but it is certain that had the United Kingdom made greater calls at an earlier date on her productive capacity, these calls would have been answered and would have inspired Canadians to make still greater efforts."

Census Next Year

Special Attention Being Given To
Statistics On Basic Industries

Ottawa.—Taking of the national census will start June 2, 1941. Trade Minister MacKinnon announced in a press statement. It will be the eighth decennial tabulation of Canadians and probably will take several weeks to complete.

Special attention will be paid to obtaining statistics on basic industries of the country.

Draft forms designed to obtain the fullest and most accurate information on agriculture have gone out to leading authorities for their approval.

Information will be sought covering the whole field of the industry. Abandoned or idle farms will be canvassed as well as agricultural production on plots which do not come within the definition of "farm."

A separate schedule will be used for each farm listing products, whether fruit and vegetables are produced for sale, and general details concerning operations.

Just Advance Guard

Contingent Of South African Troops
Now In East Africa

Pretoria.—The contingent of South African troops whose arrival in East Africa was announced officially as described as the advance guard of a "much larger" South African army which will go to East Africa.

The men, all volunteers who responded to the call of Gen. Jan Smuts, prime minister of South Africa and commander-in-chief of all South African forces, were bade farewell by the old soldiers who told them that "you are going north to meet the enemy where he can be found, not where he comes to find you—in your own homes."

Bread Dearer At Coast

Vancouver.—Bread prices rose one cent a loaf here, as the majority of bakers throughout the city put into effect a price increase they claim was forced upon them by the new federal wheat processing tax.

WANTS GIBALTAR

Recent statement by Generalissimo Franco of Spain does not surprise Britain.

Will Meet Requirements

Only Single Men Likely To Be
Trained Before 1942

Ottawa.—It is not expected married men will be called up for military training under the National Resources Mobilization Act before the end of next year, according to information here.

Speaking in the House of Commons War Service Minister Gardiner said single men between the ages of 21 and 35 would probably meet the requirements of the department of national defence in the first year.

Departmental sources confirmed a previous opinion that married men will not be called in the first year.

Mr. Gardiner said available estimates in advance of registration indicated there were 1,188,000 single men in Canada between the ages of 18 and 44. Of this group a considerable number are already in the army, the air force or the navy, some will prove physically unfit and the calls by age classes will start with 21 years.

Letters For Naval Men

New Mailing Instructions For Certain
Ships Have Been Announced

Ottawa.—New mailing instructions for persons forwarding letters or parcels to men serving in certain Canadian naval ships were announced by naval headquarters.

All mail, including parcel post, for personnel serving in H.M.C. ships Assiniboine, Ottawa, Restigouche, Saguenay, St. Laurent, Prince David, Prince Henry and Prince Robert should be addressed to the ship on which the officer or rating is serving, care G.P.O., Ottawa, Canada.

Need Women Workers

London.—An appeal for thousands of men and women to swell the ranks of munition workers was made by an official of the labor ministry, the British Broadcasting Corporation reported. He said that at least 50,000 women would be needed to work in munition factories.

Britain Makes Record-Breaking Purchase Of Wheat From Canada

London.—Britain has purchased 100,000,000 bushels of Canadian wheat, the largest single wheat purchase ever recorded, at a price described officially as "considerably above the market level."

An official announcement of the purchase was made here and confirmed by Trade Minister MacKinnon at Ottawa. The wheat will be bought up during this cereal year, July 1940, to 1941, the announcement said.

The transaction was made directly between the Canadian wheat board and the British cereal authority, the agencies that handled the sale of 50,000,000 bushels of Canadian wheat to the United Kingdom last June. Other British purchases since the war started have been made through the Winnipeg Grain Exchange.

Though Australia also is supplying the United Kingdom with wheat, it has not Canada's supplies and Canada is regarded here as Britain's No. 1 grain.

Ottawa.—Sale of 100,000,000 bushels of Canadian wheat to the British food ministry was announced in the House of Commons by Trade Minister MacKinnon.

The history-making sale—history-making because of its size—was completed after several weeks of negotiations. It was made at a price "considerably above the market," the

minister said, but, as in former announcements, he stated disclosure of the price would not be in the public interest.

From his explanation of the processing tax of 15 cents a bushel on wheat used for domestic human consumption, however, it was deduced by some that the price paid by Britain was around 85 cents a bushel.

In deciding to place that 15-cent tax on domestically used wheat, Mr. MacKinnon said the government had in mind that Canada had been charging the United Kingdom more for wheat than had been the prevailing price in Canada.

The processing tax was an attempt to make the domestic price commensurate with the price being paid by Britain, he said.

The 100,000,000-bushel sale is a futures contract, delivery to be made over a period, probably at the shipping convenience of the British authorities. At present there are slightly more than 270,000,000 bushels of visible supply in Canada and the new Canadian crop now moving will be more than 400,000,000 bushels, according to current estimates.

It has been pointed out that the present visible supply includes wheat already purchased by Britain and left in store in Canada. The minister told the house this was from 60,000,000 to 70,000,000 bushels.

Gives Credit To Men

British Captain Awarded Victoria
Cross In Modest Man

London.—Capt. H. M. Ervine-Andrews, a robust and quietly spoken soldier, was sitting in a restaurant when the radio announced that he had been awarded the Victoria Cross.

Reporters crowded around him, pressing him to relate details of the heroic action that brought him the award, but he declined.

"Afraid I can't tell you anything about that," he said, "but come and have a drink."

Then he proceeded to give all credit to the men, whom he called "magnificent" and said: "They were the chaps who really did the job. I only told them what to do."

Capt. Ervine-Andrews and his men held a line for more than 10 hours in face of superior enemy forces in the defence of Dunkirk. Although wounded, he personally shot 17 Germans with his rifle and many more with a machine gun.

Russian Paper Eased

Ottawa.—Circulation and distribution in Canada of the Moscow daily newspaper Pravda has been prohibited under the defence of Canada regulations, the national revenue department announced. Pravda is printed in the Russian language.

Arrange Free Cables

Children Sent To Canada Can Exchange
Messages With Parents

Toronto.—Canadian telegraph companies will co-operate in the plan announced in London under which children sent to Canada by the British government will exchange free cable messages with their parents each month.

The messages will be accepted at any office supplying the Canadian National telegraphs and the Canadian Pacific communications in Canada. The date for inauguration has not been set. Anglo-American Cable Company, Imperial Cables and Canadian Marconi Company also are co-operating.

The youngsters may send their parents one of eight standard texts monthly, such as "arrived safely, well and happy, writing," and "now going to school and like it."

Parents may send "have received your telegram. Glad know you are safe. Write soon." "Is there anything you specially require," or six similar replies.

Is Still A Member

Ottawa.—Canada has "not decided on discontinuing" as a member of the League of Nations. Prime Minister Mackenzie King told the House of Commons in replying to a question by George Black (Con., Yukon).

Japan Has Announced Desire To Create New Order In Eastern Asia

Tokyo.—Japan, in a long-planned expedition of foreign policy, announced it intended to create a new order in a "Greater East Asia" with Japan, China and Manchukuo as the central link and it was resolved to surmount all obstacles, material and spiritual, which might lie in its path.

The announcement of policy was phrased in general terms and did not mention French Indo-China or The Netherlands East Indies. But anticipatory statements had left no doubt that Japan was reaching far past the corner of southeast Asia to form a new sphere of interest under a new cabinet pledged to close co-operation with the army and navy, and that it intended to have Germany and Italy for its friends.

The government's first aim, it was said, would be directed toward settlement of the war in China and advancement of the national fortunes "by taking a far-sighted view of the changes in the international situation and formulating constructive and flexible measures."

The statements clarified the stand of the new government of Prince Fumimaro Konoye, which is dedicated to a strong nationalistic policy and pointed toward a single-party parliament on Fascist lines.

The first statement came from

Capt. Yuzuru Okuma, navy spokesman, regarding the United States embargo on gasoline export.

"Under whatever pretext it might have been taken," he said, "there is no doubt that it represents an anti-Japan move designed to bring economic pressure on Japan and that it constituted an unfriendly act against Japan."

"If the United States continues along such lines it is certain to cause international repercussions though the United States might have fully considered them."

Japan's military operations, he said, would not be affected.

Next was Foreign Minister Yosuke Matsuoka's first formal statement of government policy.

"In concert with those friendly powers which are prepared to co-operate with us," he said, "we should strive with courage and determination for the fulfillment of the ideal and heaven-ordained mission of our country—enabling all nations and races each to find its proper place in the world."

Then came a formal government statement of policy. In this, a "new order in Greater East Asia, having for its foundation the solidarity of Japan, Manchukuo and China" was proclaimed as the basic aim of Japan's national policy.

FROM FRYING-PAN INTO SPITFIRE

Lord Beaverbrook's call for both old and new aluminum pots and pans, brought an astonishing response from the womenfolk. Here are two Beaverbros. with their pots and pans on their way to the metal dump at Bethnal Green. These pots and pans will soon turn into Spitfire and Hurricane planes.

Not to cry, about the flight, of the wild duck leads the flock to fly and follow. —Chinese proverb.

NOTES AND COMMENTS

NATIONAL registration of all citizens, regardless of nationality, male and female, over 16 years of age, will be made on August 19, 20, or 21, from 8 a.m. till 10 p.m. This will be a stupendous task requiring voluntary help, and this paper urges all to consider carefully the questions to be answered in order to facilitate the work of the registrars and their helpers. Last week there was published in all Canadian weekly newspapers a copy of the registration form. Possibly some overlooked its importance, though many intimated that they would fill in the answers in advance. The Board of Trade in Macleod has intimated that in order to help the work of registration, sufficient copies of the registration form would be printed and distributed so that every person could fill in the answers and take his copy to the registration booth, thereby minimizing the time of themselves and the registrars in filling in the official forms. It is urged that everyone co-operate as much as possible. It is estimated that it will take an average of fifteen minutes to fill in each individual form. Some may require less, but even under the most favorable conditions and with every possible means of co-operation extended, it is doubtful if the job will be completed in three days. It is a very small part of the war effort which Canadians are asked to do, therefore they should cheerfully assist in this work.

THE calling up of men for military training will result in inconveniences to business firms, large and small, and there is some confusion in the minds of employers as to the method to be employed. Most small firms can only afford to work with just sufficient men to carry on their work, and their output will be curtailed very considerably by the calling up of employees. Yet if we are to win this war provision must be made to carry on in the best way possible with the means at our command. In Great Britain the civilian population is meeting the situation calmly and bravely, no matter what the sacrifice and the hazards may be, while we live in security. While it is agreed that there is little use in crossing bridges till we come to them, we may as well make up our mind to the fact that Canada is at war equally as much as Great Britain, and that we too must cheerfully meet the demands in war service so vital now and for many months to come.

THE arrest of Mayor Camilien Houde of Montreal for urging people not to register under the National Registration to be undertaken this month, recalls his address of welcome to weekly newspaper editors back in 1934, he being mayor at that time. He gave the impression of being a jovial individual, whose limitation of the use of the English language was very apparent, and to which he jocularly referred during his address, with many a shrug of his shoulders. He also stated that he had never travelled west of Toronto, therefore he had little actual knowledge of the western provinces. It may be that this is one reason of his narrow provincial attitude in the large affairs of the Dominion and the part it must play in the Empire's war. Personally he seemed a likeable man, very affable in typical French-Canadian style. His remarks and signed statement on national registration are offences which no government at war could overlook. It is as well that it was published by a Montreal newspaper, despite the opinion of the press censors that it should not have been. Though not actually treason, his statement in such critical times as we are experiencing borders on this very serious type of offence. A government must deal with a firm hand in this or similar instances when the whole nation is engaged in a life and death struggle.

DRIVING by night is made extremely dangerous by horses and cattle frequently crossing as cars approach. On the black topped highways particularly the danger is intensified, for the dark forms of the animals cannot be distinguished until a car is almost on them. The time has come when the roaming at large of cattle on or alongside highways should be absolutely prohibited, for the sake of the animals and automobile passengers.

THE LANGUAGE OF COURAGE

(The Red Deer Advocate)

SURELY it must be more than an accident that the Prime Minister of Great Britain in the days of her greatest trial should be one of the great masters of the spoken and written word. Winston Churchill has many gifts, and not the least of them is his rich and vigorous speech. His broadcasts since the outbreak of war, and more particularly since his assumption of the leadership of the country, are English classics. They give courage to the faint of heart and joy to the bolder spirits. They breathe that indomitable resolution which is going to carry the British cause through to victory. They are the very voice of Britain, a Britain with her back to the wall, but a Britain unafraid.

PALACE THEATRE NOTES

One of the greatest dramas ever filmed plays at the Palace at the week-end. A. J. Cronin's novel, The Citadel, starring Robert Donat and Rosalind Russell. It shows a young man in a mining camp fighting against adversity to become a doctor, finally getting his degree in medicine, and his work among miners and their families. As his fame grows and richer patients seek his services the film reveals the temptations placed before him, a world of luxury and beautiful women lure him on but with the cry of humanity ever calling him back to the citadel of his youthful ideas.

Shortly after the outbreak of the war, Mr. Cole, in order to keep his patrons in closer touch with pictorial war news and features went to great expense to book News reels that brought major world happenings to the local theatre after a lapse of only a week or more. The news reels are the same that are shown at the same time as those in the larger cities. Also he has booked for once a month the March of Time, which features some important phases of the war as well as parts of the world which are vitally affected by the outcome of the present conflict.

LEGION MEMBERS TO HONOR FRED FOUNDS

The local branch of the Canadian Legion will on Friday evening honor one of its members in the person of Fred Founds, who expects to leave shortly as a member of the Home Guard to be stationed elsewhere in the province. The honor will be in the form of a smoker, to which has been invited the president of the Alberta Division, who resides at Edmonton, and the secretary, S. G. Peley, of Calgary. Mr. Founds will be given a presentation by the members as a token of their appreciation for his services to the club and for the magnificent paintings he has drawn, which adorn the club room walls.

Make Coleman Bright with Plenty of Light

Well-Lighted Streets and Illuminated Stores

give an impression of progress and enterprise. Business is attracted to places which have plenty of light. Darkness is shunned. Coleman rates make it possible to use plenty of light at little expense. Make use of it as an aid to business. Power rates at half the light rates make the operation of electrical appliances economical. Why toil at manual labor in housework when electricity will do it so easily and so cheaply?

Complete Plans For Registration of All Canadians

Plans for registration of all Canadians having reached the age of 16 years were made known by Hon. James G. Gardiner, minister of national war services, in the House of Commons. Necessary organization has been created. It is hoped that registration will be completed by the end of August.

Members of Parliament have nominated registrars and deputy registrars in their constituencies, and they in turn will appoint deputy registrars in all polling subdivisions. The deputy registrars will post notices of registration as soon as the dates are fixed and will secure registration booths.

All persons are required to attend registration booths on the given dates, to answer questions (18 for men, 19 for women) put to them by the deputy registrars. Answers will be written on registration cards. In cases where a person is ill or incapacitated the deputy registrar may send assistant to complete the registration at that person's home.

If a person fails to register, he or she will be punished by a fine of \$200 or imprisonment for three months or both, with an additional penalty of \$10 a day for each day clapping between the close of registration and the person's registration or trial.

A fine of \$100 is provided for refusal to answer any registration question; a fine of \$200 or three months' imprisonment or both for misleading answers; and a fine of \$200 and imprisonment for any person advising any citizen to refuse or omit to comply with the regulations or impeding any officer in carrying out the regulations.

All persons will be given registration certificates, which they will have to carry with them at all times. Penalties are provided for refusal or failure to produce certificates on demand. Other penalties are provided by the registration Act for the protection of both the State and the people.

In the words of Hon. James G. Gardiner, registration of all the people of Canada will serve two

purposes, "the first one being to get a complete picture of the conditions existing with respect to man-power and woman-power in Canada today, with regard to where they are, their background and their condition of health. All information of that kind would be required, and it will be made available not only to the Department of National Defense, but to all departments of government—old age pensions, health, and so on. This information can be used for different purposes in connection with the care of our population during a period of war, and perhaps afterwards."

"The other purpose is the one which has been outlined, namely that of obtaining registration of those who are available for training Canada immediately and throughout the war period."

Indications are that voluntary organizations will be set up in each constituency, in addition to officials appointed by the government, to help carry out the task of registration.

Registrars and members of Parliament have been deluged with offers of voluntary aid.

Local Plans For Registration

Mr. Morley, of Vulcan, and E. O. Duke, M.L.A., Here Two Weeks Ago; List Proposed Names For Taking Registration.

Mr. Morley, of Vulcan, registrar for the Macleod Federal constituency for national registration, accompanied by E. O. Duke, M.L.A., was in Coleman two weeks ago making tentative arrangements for the registration here on August 19, 20 and 21.

No definite plans have yet been made according to Mr. A. Webster. He has been asked to take charge of the registration papers upon their arrival in Coleman, which he has agreed to do. The registration booths, which were used in the Federal elections, are expected to be leased but no person has been delegated to lease the buildings up to the present time. It is not known if the central school will be used due to repairwork being done.

A proposed list of registration workers has been released to The

Journal and it includes the names of Jack Rushton, Ernie Beart, Mr. and Mrs. Walter Williams, Mrs. M. McMullen, and Mrs. J. Ankill. The list is not yet complete and other names may be added. More definite information is expected to

be had by Mr. Webster within the next few days as he expects a return visit from Mr. Morley and Mr. Duke.

—Personal liberty is the paramount essential to human dignity, and human happiness.—Bulwer.

WHEN YOU REGISTER YOU GET THIS CERTIFICATE

National Registration is a plan to mobilize and direct our human resources—to assist Canada in the present crisis. When you register you will receive a certificate, convenient for card case or pocket—tangible evidence that you have complied with government regulations. It is not only a record for the Government, it is also for your protection. As such, you will be required to carry this card with you at all times. Its presentation can be demanded at any time by the proper authorities.

DOMINION OF CANADA
REGISTRATION REGULATIONS, 1940
REGISTRATION CERTIFICATE

This certificate must always be carried upon the person of the registrant.

Signature of Registrant: _____

Electoral District: _____ No. _____

Residing at: _____ (Name if any) _____

Regulations this _____ day of _____, 1940.

Signature of Deputy Registrar: _____

EVERYONE CAN HELP—To keep the cost of this registration at a minimum the Government is asking the co-operation of all public-minded citizens in the work of registration. You can help by getting in touch with your local registration officials and offering your services.

WHERE TO REGISTER

Registration offices are being set up by electoral districts in the same manner as in the last Dominion election. Registrants are required to register in the regular polling subdivisions of their own constituencies. But should a registrant be in some other province or district out of the regular polling subdivision on Registration Day, he or she may register at any registration office convenient, upon satisfactory explanation to the local deputy registrar.

Penalty for Non-Registration—Failure to register will make any male or female, married or single, over the age of 16 years, liable to a fine not exceeding two hundred dollars, or to imprisonment for a term not exceeding three months, or to both such fine and imprisonment, and moreover to a further penalty not exceeding Ten dollars for each day, after the day upon which he should have registered, during which he shall continue to be unregistered.

Registration Dates

Minister of National War Services

WORLD HAPPENINGS BRIEFLY TOLD

Chinese interests have established air mail and passenger services linking Chungking, China, with Rangoon, Burma.

The Treachery Act providing the death penalty for certain acts against the public or assisting the enemy, was passed by the senate.

The Brazilian Red Cross has sent a gift of more than 30,000 pounds of sugar to the British Red Cross of the British Broadcasting Corporation reported.

Establishment of air mail service between the United States and New Zealand completed the last link of an around-the-world service by way of Australia.

Griffith Brewer, pioneer in British aviation, who represented the nation in four balloon races between 1906 and 1922, has been elected president of the Royal Aeronautical Society.

Lord Beaverbrook, minister for aircraft production, announced that the public has contributed approximately \$9,156,888 to buy warplanes for Britain.

During Savings Week 185 children of the senior school in Leiston, England, completed 1685 (\$2,603), an average of more than 13 (\$13.55) a head.

Kenneth A. McLeod, 81-year-old Edmonton contractor, who walked beside an ox-drawn Red River cart from Winnipeg to Edmonton in 1881 and became one of Alberta's prominent businessmen; died at his home in Vancouver.

Save Scrap Metal

Easterners Put Forth Many Efforts To Further War Aid

Scrap metal—anything from German helmet trophies of the first Great War to the tin foil from cigarettes—is being collected and sold for the Red Cross; children are putting on "circuses" and garage theatrials for ambulance funds; women are giving war savings stamps as bridge prizes; men are holding wrestling matches to help the cause.

Ontario continues to be a hive of bustling win-the-war activity. In Kitchener the city council endorsed a suggestion that truck owners be encouraged to give soldiers in camp at Stratford transportation home for weekends.

Hamilton Boy Scouts collected a vast quantity of scrap, sold it to munitions firms for \$700 and gave that money to the Red Cross and the home guard.

A "Save Your Scrap League" was formed in Toronto and the movement was spreading to many places during the last week.

Women of Port Credit held a series of "canning bees" and were well on their way to supplying nearly 8,000 tins of strawberry jam to soldiers in Britain.

Won His Case

Now comes a man who brought suit against a tennis club because its members were forever hammering balls into his yard. Charging it "caused substantial discomfort and inconvenience," C. M. DeYoung went to court in Halifax, N.S., with his case—and won it. He was awarded damages of \$100.

Know Their Geography

War Has Made Most People More Interested in Maps

To many of us there has come a new interest in maps as a result of the war. Who could have stuck a flag in Narvik, Beverloo, or Rethel six months ago? Apart from the experts, who cared whether iron ore came from Norway or Spain? Many who had barely heard of Tesano, Hanfa, or Panagusta, now weigh up their political and strategic importance as though with the knowledge of years. Menel, Murnanek and Albania are names that convey a definite idea. Interest in maps is a logical sequence of war. Out of the conflict between Babylon, Egypt, and Phoenicia came the first map of the known world by Anaximander, the Greek. The victorious Roman legions built roads across the world, and using these roads as baselines, Strabo, and later Ptolemy, produced the most detailed maps then known. The rise of Islam led to the Crusades. For the first time, Italy, Malta, Cyprus and Palestine became known to arouse the imagination of rich and poor alike.

With the Spanish threat to dominate the world of the 16th century came a spate of voyages of discovery by sailors in cockle-shell boats. This period saw Mercator at work on his famous chart which became the grandfather of modern maps. Not that maps are ever really modern; no science grows more quickly. It is less than 40 years ago that maps of Africa showed much of the interior marked "unknown." — Manchester Guardian.

GIRLS' STYLE HAS WAISTBAND

By Anne Adams

This pert frock is designed by Anne Adams to delight the belle-to-be. The smart mother-to-be will like it too, for its trim wearability and easy "new-ability." Make Pattern 4495 for your daughter in one of the spirited new cotton plaids. Both the front-pointed waistline, a particularly attractive feature, and the panel of the daring skirt, would look striking out on the bias. There are two neckline styles: one square and simpler, the other trimmed with a collar which may be contrast. Pockets, bows and lace or rick-rack edging on the gray tones. Take your choice of short puffed sleeves or long, full ones. And send for a pattern without delay. Pattern 4495 is available in girls' and junior sizes 8, 10, 12, 14 and 16. Size 12 takes 2 1/2 yards 35 inch fabric and 2 1/2 yards lace edging. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Give name, address and style number. Send and orders to the Anne Adams Pattern Dept., Department Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Temporary Silos

Several kinds of temporary silos can be prepared in a hurry in order to conserve surplus crops and prevent loss of much good feed. Trench silos and pit silos, topped with layers of straw and soil have been used for many centuries; the latest stunt is to use three or four rounds of mow fence lined with roofing or heavy building paper.

Because of the ban on the shipping of goat and sheepskins out of North China farmers there refuse to raise goats and sheep.

British patents protect inventors only in the British Isles and not throughout the Empire. 2371

I Read---And Write---For You

By JOHN C. KIRKWOOD

These sidewall photographers who snap you speculatively have revived the tintype—just, perhaps, a variation. That is to say, instead of giving you a piece of tin with your photograph on it, they may give you a piece of paper, a highly sensitized black-backed paper may be used. The paper will last a long time. It takes about one minute to take and deliver to you your photograph. A special camera is used—one with its own dark room attached.

Perhaps these sidewall photographers have not yet begun operation in Canadian cities, but you can find them at Coney Island, by way of example. They charge you only 10c for your photograph.

About that big snow cruiser which Admiral Byrd took with him last year—or was it this year?—to the Antarctic, to enable him to traverse the snow-covered, ice-covered plains of the South Pole region. It has so far been a flop. It is 100,000 pounds, and you probably read a lot about it and its journeying to the South Pole. It was a very troublesome journey. It was designed, with implicit confidence in its ability to do its intended job, by a 35-year-old engineer, Charles Meyer. Meyer went with his monster baby to the Antarctic, and so himself is able to explain the machine's failure. It lacked sufficient power. Recurrent snowfalls put an 18 or 20 inch soft blanket over the ice-field, and this covering made it difficult for the great cruiser to get through and over it. But all is not lost. If and when the plain is covered with solidly frozen snow, it is expected that the cruiser will function as planned and hoped.

In Western Pennsylvania and in Philadelphia something is being done to teach young people how to operate a business. In these areas are 22 companies, representing 250 youths of both sexes, ages from 16 to 24. A group of these young people decide to form a company to make something—say a 25-cent clothes line reel or a \$10 incubator. They obtain two business or professional men to sponsor—finance their company. They apply for a charter. They subscribe for stock, and appoint officers—a

president, a treasurer, a board of directors. Their factory may be a cellar or an abandoned building. They peddle their products to housewives. The shares of the company may be priced 10 cents. An accurate record is kept of manufacturing costs and overhead and later accounts. A budget is drawn up. A profitable selling price is set. Profits are turned back into the enterprise. This sort of schooling gives those forming the company a liberal, practical education in what business is, also, it adds personal temperaments. Vividness, business and such characteristics are ironed out.

These Pennsylvania organizations are linked with a national organization called Junior Achievement, which boasts more than 5,000 embryo "industrialists," and 40,000 graduates—those who have passed the eligible for participation. Junior Achievement has been going for 20 years.

This year is the centenary of the death of Nicola Paganini, the great violinist. Paganini was one of the most fantastic and extraordinary figures, not only in the annals of music, but also in the entire history of the human race. He revolutionized violin playing. With his magic fiddle he roamed over Europe. Many who heard him really believed that he was in league with the devil. One teller of tales about him said:

"When Paganini was playing his 'Witches' Dance last night, I distinctly saw Satan himself standing behind him guiding his left hand and his right arm. His Satanic Majesty was clothed in red; he had horns upon his head, and a long hairy tail behind his legs."

This story caused uncounted thousands to go to his concerts. Another legend was that his dying mother had with her last breath breathed her soul into his violin and that this helped him to play with heartrending pathos.

Henri Ernst, the great Austrian violinist, in his youth followed Paganini around on his tours. He made it his practice to engage a room in the hotel next to Paganini's, and he loved to look through the door in order to watch the great virtuoso practicing.

Put To Queer Use

Britain Can Use Old Love Letters For Cartridge Wads

The British government has embarked on a program to make every thing useful—even old love letters for cartridge wads.

Making collection of waste paper and food, bones and metal compulsory, the government took a cue from the enemy countries. They have made a specialty of utilizing discarded material.

"We can turn old love letters into cartridge wads, meat bones into explosives, tin into tanks, garden tools into guns and we will do it," declared Supply Minister Herbert Morrison.

Synthetic Rubber

Dr. Gustave Egloff, nationally known petroleum scientist, asserts that the United States can produce all the rubber it needs from its own oil wells. Potential supply of synthetic rubber is 200,000,000,000 pounds, he says, or nearly 200 times more than the amount of natural rubber used in this country last year.

Offers His Services

Vancouver Man Rejected Second Time On Account of Age

Edwin Bagges of Vancouver is 77 years old, and although he was rejected for active service in the Great War because he was too old, he wants to fly in this one.

In a letter to Air Minister Power, Mr. Bagges said he was as active as many men 25 years younger and that he considered flying the most likely opening for him in Empire defence.

The minister told Bagges the age limit for pilots in the Royal Canadian Air Force was 28.

Fewer Dairy Products

Dairy products produced in Canada in 1939 are estimated to value \$217,736,029; a decrease of \$8,439,267, or 3.7 per cent, compared with 1938. All provinces registered declines except British Columbia.

The Venezuelan government has reduced the import duties on crude rubber and special cords and fabrics to encourage the establishment of a tire manufacturing plant in that country.

IT'S TRUE!

MICKIE ROONEY

HAS DECLARED THE OUTSTANDING 1939 JUVENILE SCREEN STAR, BY PARENTS' MAGAZINE

WAS A RECORD OF COLLECTING OLD FAN MAGAZINES

ONE DATES BACK TO 1911

NEW YORK, N. Y.—"IT'S TRUE!" that Fay Holden, the mother of the Hardy Family, and an expert swimmer, has improved her natation by mastering the "back crawl," says Wilcy Padelford. "She learned it while vacationing in the desert. A young Indian swimmer coaxed her in the stroke, one of the most difficult in swimming."

"The three first coats won by Judy Holden in 'Andy Hardy Meets History' are her own and are the first important articles of her wardrobe that she has purchased entirely on her own judgment."

SUNDAY SCHOOL LESSON

AUGUST 13

THE WORKS AND THE WORD OF GOD

Golden text: Let the words of my mouth be acceptable in thy sight, O Lord, my rock, and my redeemer. Psalm 19:14.

Lesson: Psalm 19. Devotional reading: Psalm 119: 9-16.

Explanations and Comments

The Works of God, Psalm 19:1-6. The heavens declare the glory of God, and the sky the firmament is thought of as a solid canopy as in Gen. 1:6 proclaims his handiwork. The Word of God, Psalm 19:7-11. The law of Jehovah, the testimony of Jehovah, the precepts of Jehovah, the commandment of Jehovah, the fear of Jehovah (the law which produces the fear in man's heart), the ordinance, the statutes, the testimonies denoting the Old Testament Scriptures, especially the sacred law which they contain. This law, the psalmist declares, is perfect, reviving the soul; sure, making wise the simple ("instructing the opening eye, giving light, joy to the heart, pure (clear), enlightening the eyes (a light to the mind, Most good to the eyes for ever; true, and wholly righteous).

The law of Jehovah is perfect, restoring the soul. The application is that the soul to begin with was God's; that it has wandered from God, and that the Law awakens it to its true destiny and to the realization of the extent of the drift. This is, indeed, a lesson that we do well to ponder. The great secret of the influence of Phillips Brooks was that he showed men the greatness of their destiny; he made them realize their aim, not by telling them about it, but by holding up the purity and majesty of God. He induced their repentance, showed them that they were better than they thought they were, no worse. He dwelt not so much upon the death of Christ for sinners as upon his Incarnation by which they could be made victorious. There was nothing new in this teaching, but it came at a time when men were waiting for a more positive and hopeful presentation of Christ. What God could do in Christ to restore the soul was his constant theme." (R. Bruce Taylor).

No Longer Free

Anything Building in France Now Shows The Nazi Touch

France says that democracy can expect no quarter in the battle with totalitarianism. The would-be masters of Europe will spare the bodies of their victims but not their minds. They will spare the buildings of a Paris but not the institutions of a free people. And they will seek out in each nation those collaborators who would rather live politically as Nazi district leaders—"Gauleiters"—than risk political oblivion in a fight for freedom.

It isn't France that speaks in Fascist phrases—the France that, the world over, was every man's enemy homeland. Nor will secretaries sent aloft to clip "Liberte, Egalite, Fraternite" from the facades of French public buildings ever erase that message from freemen's thinking. For in those words is France, and not France alone but that wider homeland of liberty that all mankind is seeking—Christian Science Monitor.

Needs No Runway

Jump Take-off Enables Rotar Plane To Rise Vertically

An airplane that needs no runway for its take-off was demonstrated successfully at Willow Grove, Pa., by the Pitcairn Autogiro Company, pioneer American rotor plane manufacturer.

The new machine was described by Harold F. Pitcairn, president of the company, as a plane "completely independent of ground obstacles or size for its take-off and landing. He said the new gyro needs space only one-eighth the size of a regulation airplane field for its landing and take-off."

Called the "jump take-off," the new feature of the plane enables it to rise vertically for approximately 20 ft. then take a normal climbing angle for further ascent.

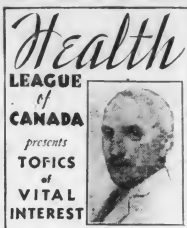

Company officials said its use for military scouting and contact work is possible.

Helps Solve Problem

Fencing off 15 acres of his farm for wild life, a North Dakota farmer says: "I believe that providing an area for the nesting and protection of wild life, grouse, Hungarian partridge, pheasants and other birds, will help me solve some of the insect problems on the farm."

Torpedoes Travel Fast

A type of torpedo used by the British and the Royal Canadian Navies, consists of a hollow steel body and an explosive head. It is cylindrical in shape, 22 feet long and 21 inches in diameter and weighs over one-and-a-half tons. It travels at a speed of about 50 miles an hour.

SAFE DRIVING

Nineteen thousand, two hundred persons were killed at night in motor vehicle accidents in the United States during 1938 and a proportionate number in Canada where the total number of such accidents was 1,545.

In United States, although less than one-third of the total daily traffic was on the highways at night, 69 per cent. of all fatal traffic accidents occurred during the hours of night and darkness.

The amount of driving after dark is higher at night and the hours of greatest fatigue are the hours of darkness; but the Committee on Night Traffic Hazards (1939) says that lowered visibility constitutes the major difference in the hazards of night and day driving. This condition may be eliminated to some degree by observation of certain requirements: Motorists should keep their headlights in good condition with the lens clean on both sides, the bulb not blackened, and the reflector shining; the electrical connections in proper condition so as to ensure adequate voltage at the lamps; if the head lamps are aimed and focussed correctly; that is, if the upper beam is used when there are no approaching drivers and the lower beam is always used when approaching other drivers and when driving on lighted highways and lighted city streets.

The average headlamp on the road is producing less than half its possible light because of tarnished reflectors, dirty lenses and blackened bulbs. The new "sealed beam" of 1940 cars is designed to provide higher light output in the driving beam for the open road and less glare for the oncoming driver than when the traffic beam is used. City lights are still poor; they have consumed much as they were in the horse and buggy days. They emit rays in all directions at about the same intensity. In many places where modern safety installations have been made, there has been a reduction of 37 per cent. in the night accident fatalities in the first 11 months of 1938 as compared with 1937.

Some cities seek to economize by waiting to turn on their lights until it is quite dark, forgetting that the traffic is the heaviest in the late hours of the day. If any reduction in night driving is desirable, it should be made in the early morning hours of summer when the streets are comparatively empty. The multiplicity of neon and other electrical signs in areas where traffic is controlled by stop and go signals has created a problem. Much study of traffic problems is needed in order to make night driving as safe as that of the daytime.

Editorial Note: Readers who would like a valuable set of articles on the Cause and Control of Cancer may obtain them—free of all charge—by writing to: The Health League of Canada, Dept. W.N.U., 111 Avenue Road, Toronto, Ont. Just say: "Please send me Dr. McCullough's articles on Cancer," and print your name and address plainly.

No Better Time

Flying Of Flag In Canada Would Seem Good Idea

This country is at war. The patriotic spirit of the people has been fully aroused. Why not, then, make it evident in one of the oldest and most revered forms of popular demonstration—the flying of flags? Such action, simple in itself, will nevertheless serve to remind Canadians of the ideals the Union Jack symbolizes. What better place for the raising of the flag than in these trying days, than in this Dominion? What finer inspiration for Britons and American visitors alike than the flag that has "braved a thousand years the battle and the breeze," and will still be flying proudly long after the swastika emblem has been lowered in defeat?—Bramford Expressor.

Japan shipped over 1,100,000 bunches of bananas to other countries in the first five months of this year.

This breakfast SPEAKS FOR ITSELF!

DAD LENDS AN EAR! The moment he pours the milk or cream, he hears Rice Krispies chattering to him with their merry crackle-pop-snap. They just beg to be eaten. So down-right crisp—and they stay crisp to the very last spoonful!

New thousands now demand POP-CRACKLE-SNAP chorus daily!

All over Canada, children and grownups listen every morning to the cheery song of crispness. Breakfasts are gayer when golden-brown Rice Krispies tumble into family cereal bowls! Tests show that Rice Krispies stay floating for hours in milk or cream. "Rice Krispies" is the trade-mark of the Kellogg Company of Canada, Limited, for its delicious brand of oven-popped rice. Order several packages tomorrow. Made by Kellogg's in London, Canada.

The Park Lane Mystery

By Edgar Wallace

Copyright, by Edgar Wallace. Serialized by Ledger Syndicate.

CHAPTER XII. Continued

She had not anticipated that it would be Harlow himself who would open the door to her. He wore a black frock coat, the ample skirts of which gave a faint illusion of a robe. She particularly noted his attitude. A large white wing collar and a stiff-looking cravat of heavy black silk, a double-breasted waist-coat, and a watch chain which he had the rare distinction of a dual butler and was as much unconscious of his elegance. But the odd thing—

Without realizing her action she shook her head slowly.

His was a tremendous personality, dominating, masterful, sublimely confident. But he was not god-like. Almost she felt disappointed. Yet if he had been the Harlow of her mind it is doubtful whether she would have entered the house.

"Most good of you!" He helped her to struggle out of her heavy coat. "And very good of Stebbings! The truth is that my secretary is down with flu and I hate employing people from the agencies."

He opened the door to the library and, entering, stood waiting with the edge of the door in his hand. As she stepped into the library her foot slipped from under her on the highly polished floor and she would have fallen, but he caught her in a grip that was surprisingly fierce. As she recovered she was facing him and she saw something like horror in his eyes—just a glimpse, swift to come and go.

"This floor is dreadful," he said jerkily. "The men from Herran's should have been here to lay the carpet."

She uttered an incoherent apology for her clumsiness, but he would not listen.

"No, no, unless you are used to the trick of walking on it!"

His concern was genuine, but he made a characteristic recovery.

"I have a very important letter to write—a most important letter. And I am the worst of writers! Dictation is a cruel habit to acquire—the dictator becomes the slave of his typist!"

His attitude might be described as being generally offhand. It struck Allen that he was not at all anxious to impress her. She missed the smirk and the touch of ingratiating pomposity with which the middle-aged

business man seeks to establish an impression upon the new and pretty stenographer. In a sense he was brusque, though he was always pleasant. She had the feeling of being put in her place—but was in an exacting—she was in the place she belonged, no higher, no lower.

"You have a book? Good! Will you sit at my table? I belong to the peripatetic school of dictators. Comfortable? Now—"

He gave a name and an address, spelling them carefully. The letter was to a Colonel Harry Mayhew, who had an office in Wall Street. "My dear Harry," he began. The dictation went smoothly from here on. Harlow's dictation was a little slow but distinct. He was never once at a loss for a word, nor did he founder in the morass of parentheticals. Toward the end of the letter:

"...the European situation remains settled and there is every promise of a revival of trade during the next few months. I, for one, will never believe that so unimportant a matter as the Bonn affair will cause the slightest friction between ourselves and the French."

She remembered now reading of the incident. A quarrel between a sous-officer of the French army and a peppery British colonel who had gone to Bonn.

So unimportant was the incident that when a question had been raised in the House of Commons by an inquisitive member, he had been greeted by jeering laughter. It seemed surprising that a man of Harlow's standing should think it worth while to make any reference to the incident.

He stopped here, pinching his chin and gazing down at her abstractedly. She met the pale eyes—was conscious that in some ineffable manner his appearance had undergone a change.

The pale eyes were deeper set; they seemed to have receded leaving two little wrinkles of fish to spoil the unmarked smoothness of skin. Perhaps she was mistaken and was seeing now, in a leisurely survey, characteristics which had been overlooked in the shock of meeting him at Potheringay Mansions.

"Yes," he said slowly, answering as it were, a question he had put to himself. "I think I might say that Will you read back?"

She read the letter from her notes and when she had finished he smiled. "Splendid!" he said quietly. "I envy Mr. Stebbings so efficient a young lady."

He walked to the side table, lifted a typewriter, and carried it to the desk.

"You will find paper and carbon in the top right-hand drawer," he said. "Would you mind waiting for me after you have finished the manuscript? It shall not be more than 20 minutes."

of a mind to throw the paper into the fire, but it was natural that she should find excuses for her conduct. And her excuse (stoutly offered and defended to herself) was Jim Carlton and the vague familiarity of "Marling."

Ten minutes passed and then Mr. Harlow came slowly into the room. The door closed with a click behind him and he stood before her on the very spot where Mrs. Edwins had conducted her cold survey.

"My housekeeper came in, didn't she?"

"Yes." She wondered what was coming next.

"My housekeeper"—he spoke slowly—"is the most unbalanced female I have ever known! She is the most suspicious woman I have ever known, and the most annoying woman I am ever likely to know."

His eyes did not leave her face.

(To Be Continued)

One Scheme Failed

Hitler Planned To Upset International Currencies By Forgery

Not the least important among Hitler's crafty schemes to smash the British Empire was the amazing plan to upset international currencies by means of large-scale forgeries. Adolf had an idea that the pens of his counterfeiters were mightier than Britain's democratic swords.

The Nazi public debt is placed at £1,000,000,000 marks (nearly \$20,000,000,000 at pre-war levels), and daily gets worse.

So Hitler set about forging British treasury notes, with the object of obtaining cash to buy war necessities in neutral countries. Thousands of forged notes were all traced to one source.

But Britain was not caught napping. British scientists had kept one jump ahead of the Nazi forgers. The government secured exclusive use of a certain new secret material, and promptly used it in the new pound and ten-shilling notes.

The weave and composition of the thread running vertically through the notes are a highly prized secret, and make the new issue forger-proof.

In these treasury notes the Bank of England has taken a tip from the Reserve Bank of South Africa in incorporating an unusual anti-forgery device which, among other things, will stop the "split-banknote" trick, a favorite practice in the past when back-time counterfeiting set the South African police authorities many ingenious, sometimes romantic, problems.

But the practice of numbering notes gave the forger his biggest headache, and the presence of duplicate and unissued numbers among notes circulating recently among the British public was a discovery of Nazi counterfeiting and the issue at short notice of new British notes.

British treasury notes and British coinage are acknowledged as symbols of international financial integrity, a fact proved by the royal mint making currency for most of Europe. Germany, on the other hand, is painfully short of currency. Gangster-like Hitler thought it an excellent idea to muscle-in with clever forgeries. But the scheme was short-lived. He argued that a British royal mint has an exclusive clientele extending from Yugoslavia to Bolivia, and that there are between customers far more ways than one of trapping the wild men of the Wilhelmstrasse, who find it increasingly difficult to buy anything anywhere.

Determining Factors

Events And Will Of People Govern Progress In Democracy

It may be said by some that the wheels of progress in Canada turn slowly since it has taken 30 years for obviously necessary reforms to win their way. In some respects there is ground for criticism, for such measures as health and unemployment insurance, which are not yet in operation here, were adopted in New Zealand and some of the Scandinavian lands over 40 years ago.

On the other hand, the passage of legislation in a democracy has to wait until the consent of the majority is won. Unemployment insurance is now here because a generation has grown up that is convinced of its need. This and other reform legislation have come not strictly as party measures, but when all parties were united in their favor. History shows that events and the will of the people are the determining factors in issues such as this.—Toronto Star.

Considered Best Feed

Experiments Show Barley Is Superior For Bacon Production

According to the report for 1939 and up to July 1, 1940, of the National Barley and Lined Flax Committee submitted at the recent meeting of the National Advisory Committee on Agricultural Services held in Ottawa, on July 17th, the results of the barley feeding experiments show conclusively that barley is superior to corn or oats as a feed for bacon production. This superiority is both in the cost of production and in the quality of bacon produced.

The grades of feed barley have been improved to meet this demand. There is, however, continues the report, a further problem that might be considered by the National Feed Committee, namely, that of grading barley meal.

GEMS OF THOUGHT

LIGHT OF RELIGION

Light is down for the righteous, gladness for the upright in heart.—Psalm 97:11.

It is mind, after all, which does the work of the world.—Channing.

Materially minded men and women don't really unite; only through spiritual unity can people progress.—Lady Astor.

He who sees clearly and enlightens other minds most readily, keeps his own lamp trimmed and burning.—Mary Baker Eddy.

Let thy religion be seen. Lampry do not talk, but they do shine. A lighthouse sounds no drum, it beats no gong; yet far over the waters, its friendly light is seen by the mariner.—Cuyler.

Walk in the light and thou shalt see Thy path, though thorny, bright; For God, by grace, shall dwell in thee, And God Himself is light.—Dorland Earton

The Standard Parachute

Measures 21 Feet Across And Cost Is About \$200

Parachutes have played a big part in the war in Europe. Not to speak of war itself, they have done for so-called "parachute troops," we may think of the hundreds of aviators who have been saved by them. With a plane burning, or in some other way made unfit for flying, the pilot and anyone else aboard may leap out and reach the ground safely.

Parachutes differ in size, so we cannot give figures which will fit all of them. Recently a standard British parachute was described as having "65 square yards of finest silk" and as measuring 21 feet across. The cost was given as about \$200 for each parachute.

Retains Value Indefinitely

British doctors and scientists have discovered a method of keeping blood for transfusions so it retains its value indefinitely. Health Minister Macdonald told a luncheon meeting in London, according to a British Broadcasting Corporation report. He said that up to now blood obtained from voluntary donors retained its value for four weeks only.

Food By The Ton

The daily issue of foodstuffs to feed an army division of, for instance, 15,000 men, takes on gigantic proportions. Eight tons each, of beef, bread and potatoes, one ton of jam, another of butter, as well as 28 pounds of pepper are required.

For timid women often left alone in the house a knocker with a hole through which they can peek at those who knock has been devised in London.

Red Army Goes Swank

Russian generals henceforth will be provided with brilliant, ceremonial field uniforms, distinguished from their former attire by gold buttons, silver and gold braids, shoulder straps and Sam Browne belts, according to a decree published in Moscow.

Following Items go to make up a very subdued menu:

"Crushed" berries, "mashed" potatoes, "whipped" cream, and "beaten" biscuits.

A quarter million tulips were in full bloom in Leeds, England, parks.

BURGESS' RADIO BATTERIES

Cost Less

Because... they have much more active electric power during material and last much longer.

Always buy the batteries with the Burgess Radio Batteries logo.

HOME SERVICE

EASY TO GIVE YOUR DOG THE PROPER SUMMER CARE

Take Those Rules for a Guide

Summer heat waves affect your dog as they do you. But it's not hard to keep your dog healthy and happy all year round—even during the difficult "dog days"—when you know the proper care.

It's always important for a dog to have plenty of fresh, pure drinking water. During a hot spell keep his drinking pan shaded and refill at least three times a day.

If your dog enjoys swimming let him cool off this way as often as he likes. But frequent bathing with soap is bad for his skin and unnecessary, since doggy odors are not due to perspiration but to wrong diet, unclean sleeping quarters, lack of right grooming and exercise.

In warm weather a full-grown dog should be fed once a day and meat should be given him in summer as well as in winter. A well-balanced diet includes milk and vegetables, but not too many starches.

And don't be alarmed if your dog eats grass. Grass is a natural laxative he may need.

Complete details on the right diet are given in our 32-page booklet. Tells how to recognize and treat dog ailments; has instructions on grooming, housebreaking, training, teaching clever tricks.

Send 15c in coins for your copy of "How to Choose and Care for Your Dog" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

- 157—"Decorative and Useful Things to Make with Paper"
- 158—"Songs from 'Way Down South'"
- 159—"What You Should Know About Nursing"
- 160—"Effective Phrases for All Occasions"
- 161—"The Correct Thing To Do"
- 162—"How to Budget and Buy for Better Living"

Kept In Circulation

All Money Collected In Taxes Is Put To Work

The Peterborough Examiner says: The Government does not get its money and then keep it. The one and only reason why a Government takes money from the people is that it wants to spend it, and when it spends the money it is in circulation. That money goes out working rather than remaining in deposit boxes in the form of securities or in banks as deposits.

It means that larger pay rolls will be created, that more people will be working and that fewer will have to ask the relief office for support.

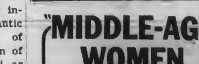

After careful experiments, C. A. Arbutnot, Hayling, Eng., announces that hens produce a larger quantity of eggs when fed sawdust, a 10 per cent mixture over a certain period.

Three 4,000-horsepower Diesel electric locomotives with a top speed of 117 miles per hour are now in service between Chicago and Denver.

in-training at Holy Cross hospital,
Calgary, returned home on Tuesday
evening to spend three weeks vaca-
tion with her parents, Mr. and
Mrs. J. S. D'Appolonia.

The Misses Penelope, Peggy and
Florence McDonald spent part of
the week at Waterton. They re-
turned home today, Miss Penelope
having to leave for Brockton to-
morrow, where she is on the staff
of the Brockton hospital.

In this week's issue will be
found an advertisement telling all
Journal readers in need of having
saws, knives, scissors, etc., sharp-
ened, that Ernie Beart of Fifth
street guarantees them an expert
job at most reasonable prices.

Many good buys can be had at
the Frank Aboussafy store in dry
goods. Posters were distributed
throughout town last week telling
of special bargain prices on a large
number of goods. Pass buyers are
invited to drop in at the store and
inspect the counter displays.

Dr. and Mrs. Malcolm McCallum
and two children, of Stettler, Al-
berta, Mrs. Malcolm McCallum, sr.,
and her daughter, Miss Marion, of
New Dayton, visited old friends at
the tennis courts on Sunday morn-
ing. They were enroute to Salmon
Arm, B.C., where they will spend
an extended visit with Mr. and
Mrs. Luke Lindoe.

Many people from all over the
Pass attended the opening day of
the big sale of dry goods at the
Charles Nicholas store. The sale
continues for another two weeks
and many bargains are still to be
had.

Gillies, and Mr. and Mrs. Neil
Fleming, jr., motored to Leth-
bridge on Saturday. Mrs. Robert
Gillies motored to Shaughnessy
where she is the guest of friends
for a week.

Mr. Wm. Taylor, local C. P. R.
agent, is spending a vacation at
his home at Edmonton. During
his absence Mr. C. McGill, night
operator, has been transferred to
the day shift. Mr. J. Grooves, of
Edmonton is relieving night operator.

COLGATE-PALMOLIVE-PET MUST CHANGE ADVERTISING

Washington: The Federal Trade
Commission said that the Colgate-
Palmolive-Pet Company of Jersey
City and its subsidiary, Kirkham
& Co., Inc., New York, had agreed
to desist from what the Commission
called "certain representations" in
advertising. Among other things,
the Commission said, the companies
agreed to "discontinue representing
by use of the unqualified statement
'made with olive oil,' as descrip-
tive of 'Palmolive' soap or
shaving cream, or by assertions of
like import, that the oil or fat con-
tent of such products is wholly or
predominantly olive oil."

Men trust rather to their eyes
than to their ears. The effect of
precept is therefore slow and
tedious, while that of example is
summary and effectual. —Seneca.
